

data bricks dbutils commands in tabular formats

Here's a tabular format showcasing some commonly used dbutils commands in Databricks:

Command	Description
dbutils.fs.ls(path)	Lists files and directories at the specified path
dbutils.fs.mkdirs(path)	Creates a directory at the specified path
dbutils.fs.cp(srcPath, destPath)	Copies a file or directory from source to destination
dbutils.fs.rm(path, recurse=True)	Removes a file or directory at the specified path
dbutils.fs.head(path)	Displays the first few lines of a file
dbutils.fs.put(localFile, remotePath)	Uploads a local file to the specified remote path
dbutils.fs.get(remoteFile, localPath)	Downloads a remote file to the specified local path
dbutils.fs.mv(srcPath, destPath)	Moves a file or directory from source to destination
dbutils.fs.mkdirs(path)	Creates a directory at the specified path
dbutils.fs.mkdirs(path)	Creates a directory at the specified path
dbutils.fs.cp(srcPath, destPath)	Copies a file or directory from source to destination
dbutils.fs.rm(path, recurse=True)	Removes a file or directory at the specified path
dbutils.fs.head(path)	Displays the first few lines of a file
dbutils.fs.put(localFile, remotePath)	Uploads a local file to the specified remote path
dbutils.fs.get(remoteFile, localPath)	Downloads a remote file to the specified local path
dbutils.fs.mv(srcPath, destPath)	Moves a file or directory from source to destination
dbutils.fs.mkdirs(path)	Creates a directory at the specified path
dbutils.fs.mkdirs(path)	Creates a directory at the specified path
